FREE seminar and
unique learning opportunity

As·set man·age·ment

Asset management: *a system whereby things that are of value to an entity or group are monitored and maintained.*

Today more than ever, the rail sector needs to focus on efficient resource utilisation and this is why Systecon has created the 'Whole Life Asset Management' event. As business grows ever more complex, it becomes increasingly challenging to ensure that all the assets across your business are aligned and performing to their best potential. To achieve profitable operation requires not only a good business deal but also a complete set of success factors from good contractual incentives through effective planning to resource dimensioning and cost control.

Systecon Consultants have in-depth knowledge and experience of balancing and optimising resources; manpower, spares, test equipment, to meet the twin objectives of fleet availability and budgets. The Whole Life Asset Management seminar will give visitors unique access to speakers from Systecon, and end users of its systems, to gain insight into their experience and benefit from peer-led discussions and case study materials.

Using a knowledge-based approach, the seminar will be of benefit to senior staff in the rail sector that are responsible for asset management, or for those who want to learn from Systecon's proven results in improved fleet availability, efficient depot resource utilisation, improved operational profile and tailored maintenance plans.

By attending this event you will:

- **DISCOVER** the real benefits of Asset Management
- **LEARN** about Asset Management in a global and local context
- **UNDERSTAND** the methods available
- **APPRECIATE** the importance of an integrated approach
- **FIND** new techniques to manage assets

Agenda & Speakers

Ulf Westberg Ph.D.

Senior Specialist - Department for Advanced Vehicle Performance and Assurance - Bombardier, Sweden.

Ulf supports projects and bids within the Passengers Business Unit at Bombardier Transportation for all sites in Europe and Australia.

He also supervises the use of the web-based integrated logistics database (ELSA) in use within major projects with the Supplier communication tool BLESS+.

Pegvak Assadi

Head of Business Area, Transportation & Industry - Systecon AB

Pegvak has worked extensively as a Consultant at Bombardier in Sweden where he was the Project Manager RAM/LCC for the High Speed Project in China and the New Delhi Project in India, working on both projects together with Ulf Westberg of Bombardier. He is currently acting as the Sub-Project Manager at SL in Stockholm for verification of X60 trains supplied by Alstom trains.

Pär Sandin

Vice President - Systecon AB

Pär has been engaged for over 10 years by Stockholm Transport with projects ranging from specification of a new CMMS for all train fleets to, presently, Sub-Project Manager for the procurement of the next generation of underground trains. Pär has also worked for other rail companies on a range of projects within the fleet management field.

Ole Robertsson

Business Manager for Commuter Train Traffic - AB Storstockholms Lokaltrafik

Ole has worked within the rail industry for over 30 years. He has had a lot of different responsibilities such as Depot Manager, Project Manager for the procurement and introduction of the newest underground trains now operating in Stockholm and, presently, as Business Manager for the commuter train fleet in Stockholm.
